

Catchy hooks with uncompromising sounding / Danceable melodies from Hungary

OIEE is the colorful electronical solo project of **Bence Kocsis** launched in 2019. He is a well-known name in the Hungarian underground music scene both as a producer-songwriter, organizer, multimedia artist, the host of live impro electronical music series '**WOPO-WOPO**' and leading singer of bands **Saverne** and **Window**.

OIEE's main genres are **nudisco, dance and R&B, mixing instrumental sounds with tropical and not-so-tropical house, techno, disco and trance elements and modern soul-like vocals, giving danceable melodies and catchy hooks a very individual and uncompromising sounding.** *"With this project, I wanted to try what it is like to work with other singers, even in the form of remixes. Many music has gathered in my brain over the years, for which I wanted to make a separate platform. This is more like a production work, less bounded by the band-specific compromises."* - said Bence on *Index*.

He already published two music videos for his upcoming album *Urban Camouflage*: the first one, for the track '*Stays Like This*' (featuring **FlorasFloras** alias Flora Kiss) was awarded "*The Best Scene*" music video of the year on **Magyar Klipszemle** 2019. The second video made for the song *Still Dey Inside* - the track itself debuted on **BBC 1Xtra** channel - is featuring amateur dancers and is based on an improvisational dance workshop. *"We recorded a multi-hour impro dance recording with minimal instructions. We sought to bring 'instincts' to the forefront, while ignoring professional dancers. An underground techno party meeting a tribal dance around a campfire."* - Bence told *24.hu* about the making of the video.

OIEE's first LP is to be released on the 8th of May 2020. *Urban Camouflage* features artists such as **M3nsa** (UK / GH) and **Amaarae** (US / GH). The album attempts to show how the organic is mixing the artificial, how the superficial monotony of everyday life can be blend together with instinctive, deeper energies.
